**SOAP S.r.l.,**

through management aimed at protecting the environment, mitigating and safeguarding natural resources and the correct implementation of prevention and reduction measures for workers' health and safety risks, through:

- ✓ the careful analysis of the company context and risks, aimed at the search for continuous opportunities for improvement;
- ✓ the increase in business activities and the strengthening of territorial identity through the involvement of customers, the commitment to environmental protection, including the prevention of pollution;
- ✓ the containment of emissions into the atmosphere, water, noise and soil, the reduction of impacts on climate change, the optimization and use of natural and energy resources, the protection of biodiversity, maximizing the recovery and recycling of waste;
- ✓ the improvement of processes, technologies and working methods to optimize environmental and safety performance, with the contribution of research and development, through the search for best experiences and good practices;
- ✓ the promotion and involvement and consultation of workers and their representatives in the main processes of the Management System, with particular regard to safety prevention and continuous improvement;
- ✓ the participation of workers and their representatives, in the ways provided for by law and by the Management System, regarding risk assessment, prevention and protection measures (using the hierarchy of controls), training programs, information and training, the communication process, the preparation and response to emergencies;
- ✓ the management of its activities in compliance with applicable regulatory principles and commitments with interested parties;
- ✓ the prevention of risks to the health and safety of workers;
- ✓ the prevention of accidents and occupational diseases;
- ✓ the compliance with safety and environmental regulatory requirements;
- ✓ the commitment to continuous improvement to increase environmental and safety performance;
- ✓ the pursuit of assiduous and constant collaboration with suppliers of materials and services in order to activate relationships based on continuous growth;
- ✓ the accurate control of service delivery phases also through continuous attention to technological innovation and technical development of its resources;
- ✓ the care of professional growth for all company personnel;
- ✓ increased awareness among operating personnel of their contribution to the effectiveness of the management system;
- ✓ the continuous improvement of its management system to achieve ever higher levels of excellence through the definition and periodic review of quality, environmental and safety objectives;
- ✓ the effectiveness and efficiency of its corporate management system, including through a reduction in costs related to products and processes.

**SOAP S.r.l.,**

is aware that the objective of quality assurance and respect for the environment and safety requires a constant commitment on the part of all the personnel and that it can be successfully achieved only through its full involvement.
